Titanium Tube-Stack Heat Exchangers

Tel: +44 (0)1527 62210 - www.thermex.co.uk

Introduction

Founded in 1979, Thermex is now recognised as a manufacturer that delivers innovative designs and quality products to a global customer base from its extensive range of liquid and air cooled heat exchangers.

The Thermex standard marine shell and tube range includes; oil coolers, raw water/fresh water heat exchangers, exhaust manifolds and charge air coolers. The removable header and floating tube stack allow easy maintenance supported by the availability of replacement tube bundles and service kits.

The design of Thermex tube stacks is versatile and can be adapted to fit into the bespoke housings of equipment manufacturers. Thermex heat exchangers undergo 100% pressure testing in our factory and can be supplied with full material certification by internationally recognised independent classification societies such as; Lloyds Register, Bureau Veritas, ABS, DNV and NKK is also available.

The reliability of the marine range has resulted in a well earned reputation with established companies from the industry including manufacturers of;

- » Marine Engines and Systems
- » Deck Handling Equipment and Winches
- » Marine Hydraulic Power Packs
- » Marine Generators
- » Marine Gear Boxes
- » Thrusters

Features and Benefits;

- » Comprehensive Range
- » Shell diameters from 3" to 8"
- » Lengths from 175mm to 1811mm
- » Variety of threaded and hose tail connections
- » Floating tube stack design
- » Easy to maintain and service
- » Sacrificial anodes available on request
- » Leak detection rings (2700 and 2800 series)

Materials and Configurations

The Thermex Titanium Heat Exchangers are designed and manufactured in the same way that has made our standard oil cooler range one of the most widely used cooling products in the world, but now with the addition of Titanium tube stacks for the ultimate “fit and forget” solution.

Even though Titanium is highly durable, the heat exchangers have still been designed to be easy to service and maintain when required.

Construction Materials;

Body

Aluminium 6063 (2300 and 2500 Series)
Aluminium LM6M (2700 and 2800 Series)

Tubes

Titanium Titanium Gr.2

Tube Plates

Titanium Titanium Gr.2

Headers

Gunmetal LG2
(Other materials such as Aluminium Bronze, 70/30 and Titanium available upon request)

Seals

Operating up to 100 °C Nitrile
Operating up to 120 °C Viton

2300T Series

Type	A (mm)	B (mm)	C (mm)	D (BSP)	Kg	Oil Vol (L)	Water Vol (L)
