# Thermex Gearbox Oil Coolers

**Thermex Gearbox Oil Coolers** are a new generation of Marine Transmission Cooler providing an efficient and reliable cooling solution at a competitive price.

Compared with traditional brass tube coolers, the Thermex Gearbox Oil Coolers provide an increase in performance, thanks to the high density tube stack and efficient cooler design. This allows for a smaller cooler to be used reducing costs and space claim.

## • Materials

<b>Tubes</b>	-	90/10 Cupro-Nickel
<b>Tube Plates</b>	-	Naval Brass
<b>Shell</b>	-	Aluminium
<b>Headers</b>	-	Glass Filled Nylon (GFN50)

## Part Number

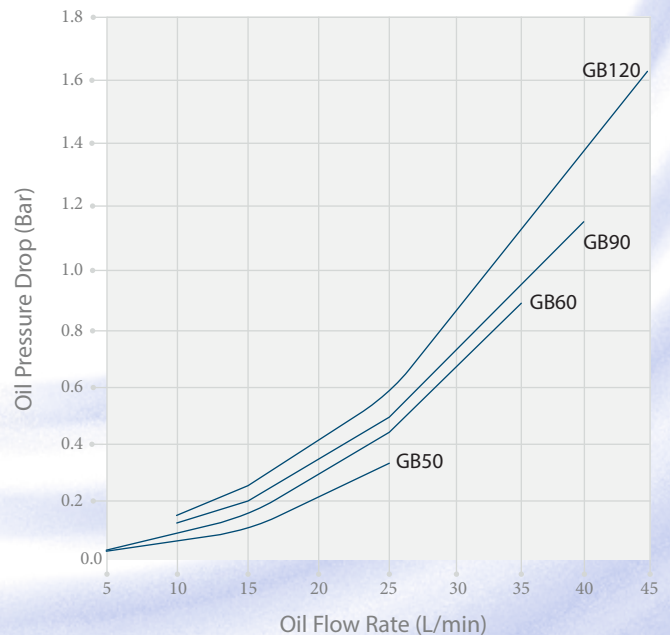

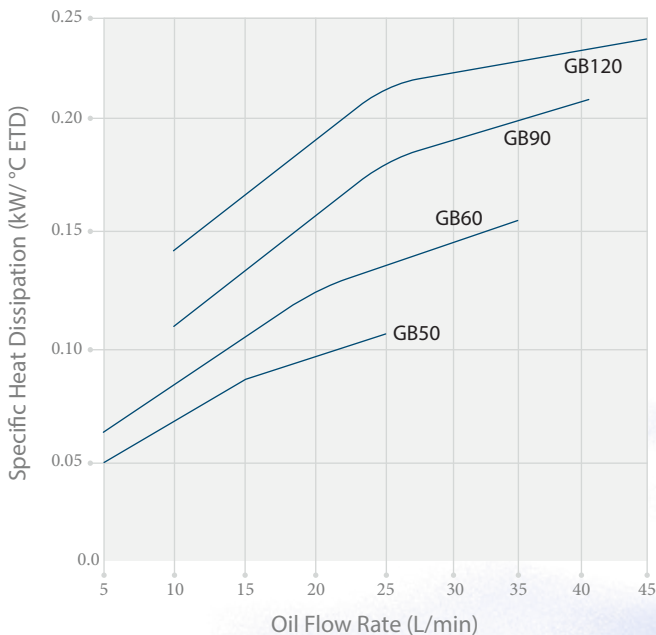

Thermex Gearbox Oil Coolers are available in various lengths with a choice of oil and water connection sizes, making them suitable for a greater number of transmissions and engines.

Start by selecting your model number (see drawings on previous page for dimensions) followed by the oil connection size, then the water connection size and finally your part number based on whether you require the mounting feet shown in the drawing or just two M6 holes (without foot) instead.
